DATE RECEIVED: 12/10/22

TITLE / CATEGORY: Crewing/Appliance/station information - Maps

REQUEST

I wanted to know if your fire brigade used map in order to create itineraries to the places of intervention. How is the map presented and what kind of format do you use in order to have all the information but also be easily usable by firefighters.

RESPONSE

Tyne and Wear Fire and Rescue Service use maps. Our firefighters use a Mobile Data Terminal (MDT) within the appliance to view maps while on route and on site at an incident. The MDP displays maps at different scales using overlays to the incident location and to track our route. Icons display to provide risk information once selected.

Any printed documents are considered uncontrolled.
