1 Request

I would like to request under the Freedom of Information Act data held by Tyne and Wear Fire and Rescue Service on vehicle fires attended by your emergency crews for the financial years 2017-18 to 2022-23 inclusive.

The information I am seeking relates directly to vehicles which have caught fire either while parked or while in use. An example would be a car which catches fire while parked outside a house or a car which catches fire while driving along the road.

I am not looking for information on vehicles which have been deliberately set alight or that have caught fire after being involved in a road traffic collision.

I would like information held by Tyne and Wear Fire and Rescue Service broken down into the following categories:

Type/Class of vehicle (such as Car/SUV/MPV/Van/HGV)

Make: (Such as Ford/Vauxhall/Mercedes/LandRover)

Model: (Such as Mondeo/Corsa/E-Class/Discovery)

Fuel: (Such as Petrol/Diesel/LPG/Hydrogen/Hybrid/Electric)

I would also like information as to whether the vehicle fire caused any casualties / fatalities or caused damage to other vehicles / buildings.

2 Reply

- 2.1 The following information is taken from Tyne and Wear Fire and Rescue Service (TWFRS) Incident Recording System (IRS). An IRS incident record is completed by the Officer in Charge for every incident attended.
- 2.2 Firefighters record the suspected motive (reason) for the start of a fire. Fires are categorised as: accidental, deliberate or unknown according to the probable cause, as observed at the scene.
- 2.3 Sometimes, it is not possible to determine a motive. In such cases the motive will be recorded as 'not known'. As a general rule, fires where the motive is 'not known' are counted with accidental fires. So, accidental fires will include a small number of fires where the motive cannot be determined with any reliability.
- 2.4 This is the number of accidental and not known vehicle fires attended by TWFRS within Tyne and Wear over the six fiscal years from (1st April 2017 to 31st March 2023).
- 2.5 The type of vehicle is obtained from the property types in our IRS incident recording system.

- 2.6 Makes and models of vehicles are not always recorded on the incident reports. Where they are mentioned I have included them in the tables in this report, but approximately 30% of the incident reports do not mention either the make or model.
- 2.7 Our incident reports do not ask for the fuel type of the vehicle so this data is not available.

3 Data

3.1 All accidental/not known vehicle fires in Tyne and Wear over the six year period of this report. There is an upward trend in the number of accidental/not known vehicle fires over this six year period. The dip in 2020/21 coincides with the Covid lockdown period.

3.2 Vehicle fires by the property type in the Incident Recording System (IRS).

Vehicle Type	2017/2018	2018/2019	2019/2020	2020/2021	2021/2022	2022/2023	Total
